Software developer with 5 years of experience in the software industry. I'm passionate about software engineering and advocate for software excellence. Experience in software development on the back-end, front-end, and testing.

PROFESSIONAL EXPERIENCE

At ThoughtWorks - Software Development Consultant - (September/2020 - PRESENT)

- I'm a consultant and part of a strategic team that attends a big tech US company.

At DELL - Software Development Engineer - (August/2019 - September/2020)

- Full-stack development on a global level project for document management for **Dell Financial Services**. Responsible for the development of a front-end project using Angular 7, and also I've worked transforming a legacy Java enterprise monolith service into a brand new Java spring-boot microservices running in the cloud (PCF).
- I participated in several transformations of the team to support the digital transformation of the company, spreading the word of quality and helping with new agile practices. Extreme Programming (XP) Agile practices with TDD and Pair Programming.
- DevOps and CI/CD oriented, managing pipelines running on GitLab highly coupled with tests and code checks.
- I also worked on various activities of the testing pyramid and during this position, I developed/set up extensions on the front-end project allowing the team to write unit tests on the front-end using Karma and Jasmine, and also e2e tests using Protractor and Cucumber.

At DELL - Software Development Engineer in Test (SDET) - (October/2018 - 06/2019)

- I worked as an SDET on a global level project for document management for Dell Financial Services. I helped the company/team to achieve the goals for quality within the test organization developing and maintaining an amazing test automation project using .NET C#.

At Stefanini IT Solutions - Software Developer - (September/2017 - 10/2018)

- I worked as a third party software developer for Dell, main activities as an SDET. I was responsible for the modernization/maintenance of a test automation project, helping the team creating a new .NET C# project from scratch, using the best practices and a framework from the company, thinking about what would fit best for the community/teammates to jump in.

At Plugar Data & Intelligence - Software Developer - (May/2017 - 09/2017)

- I worked as a software developer for a project that collects data from Brazilian government websites (<https://monitorgov.com.br/>), processes, and displays that information on a portal. I was responsible for developing new features for a front-end project and creating bots for web scraping using C#.

At Agência Experimental de Engenharia de Software (AGES) - PUCRS - (January/2017 - June/2017)

- The AGES was an opportunity for engineering students to work in real-life projects, interacting with stakeholders and developing software products. I helped the team as a lead developer defining the architecture and also developing a simple project to collect, store, and present Ideas for the academic community.
(<http://www.ages.pucrs.br/lista-de-projetos-2017-1/ideias-ages/>)

Technologies: JavaScript, Java, JSP, MySQL, GitLab.

At Zeeng - Data Driven Platform (Plugar Data & Intelligence) - Software Developer Intern - (September/2016 - May/2017)

- Front-end development for an MVP big data portal that displays a bunch of insight for the marketing area (<https://www.zeeng.com.br/>). Also, I was responsible for creating web scraping bots, and back-end development for consuming APIs from the principal social media at that time.

COURSES AND EDUCATION

Unisinos - Bachelor of Information Systems - degree expected in June/2023

Instituto Livramento - Computer Technician 2011

Alura - JavaScript Advanced I and II - ES6

JavaScript for web applications

TypeScript I - Basic and advanced

Angular fundamentals and advanced

Rest with NodeJS: API with Express and MySQL

React: Component life cycle

CSS Grid

Linkedin Learning - Programming Foundations: Test Driven Development

C# - Test Driven Development

Pivotal - Pivotal Web Services (PWS) - June/2019

Microsoft Students to Business - C# Development - (07/2016 - 12/2016).

PUCRS - Scrum and Kanban mini course.
